THE VOGEL PUMPEN BRAND HAS BEEN MIGRATED TO CREATE THE LOWARA VOGEL SERIES,
A NEW NAME IN HEAVY INDUSTRIAL PUMPS.

A new dawn: Vogel migrates to Lowara.

INCORPORATION OF THE VOGEL PUMPEN INTO OUR FLAGSHIP BRAND LOWARA.

"The incorporation of Vogel Pumpen into our flagship Lowara brand enables us to retain the Vogel Pumpen heritage, which in turn provides our customers with the reassurance that they are dealing with a trusted heavy industrial pump brand backed by Xylem's global expertise. The Lowara Vogel Series pumps also significantly strengthen the Lowara offering, widening its potential field of applications beyond commercial and residential into new industrial sectors such as oil & gas, mining, power generation and steel mills; reinforcing our position as a market leader in pumping solutions."

Andr  Dhawan
(President of Xylem EMEA)

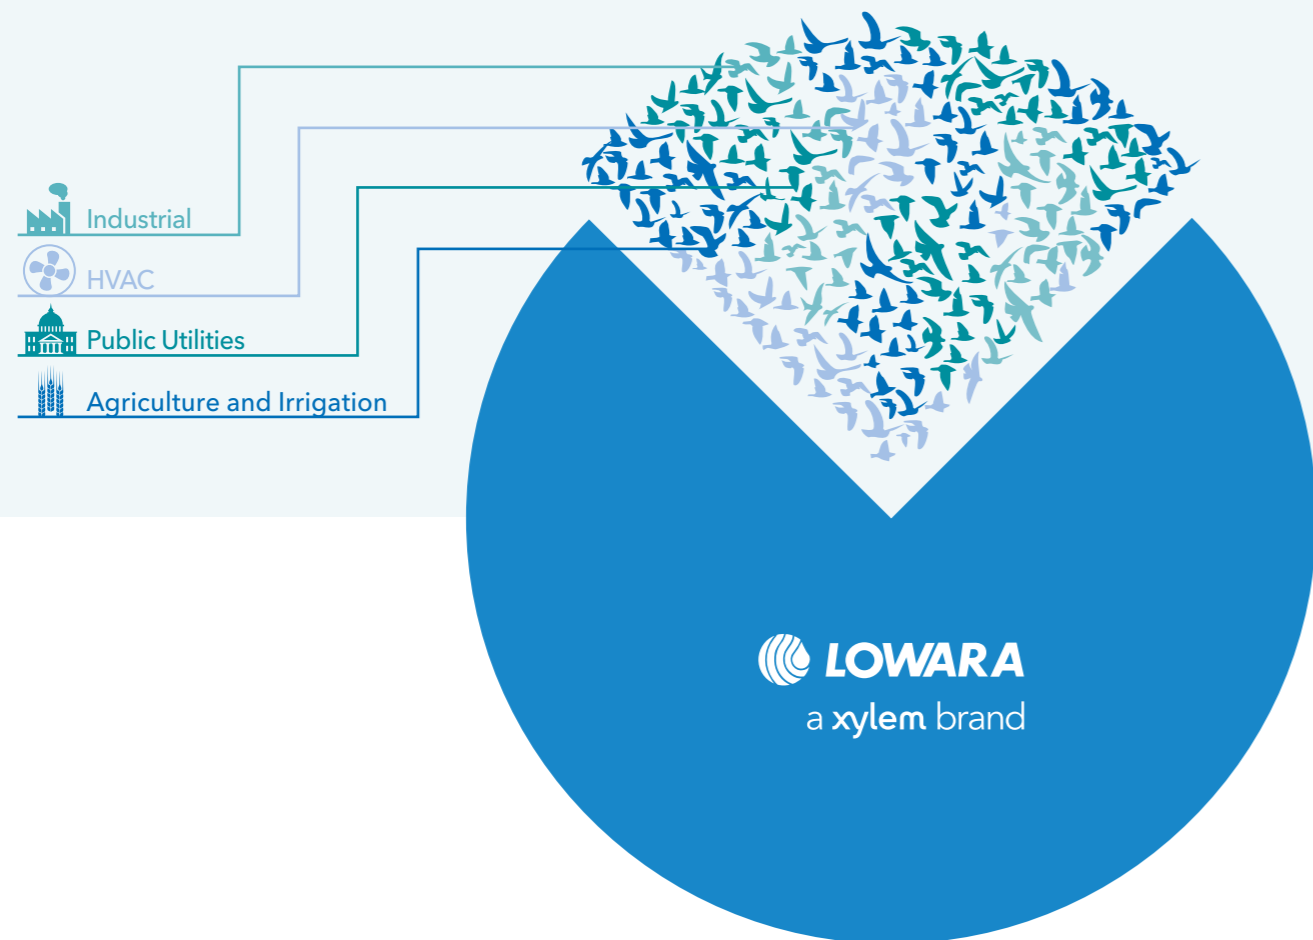

Vogel brings a rich 105 year heritage within the heavy industrial pumping sector: since the company was founded in the 1909, innovation and new patented features have been presented to the market. Pump selection is crucial. We work closely with our customers to help them select the right pump for each specific application to maximise performance and operational efficiency. We encourage customers to specify pumps based on the total cost of ownership, which includes price, maintenance and running costs. The enormous advances in pump technology in recent years, such as new high efficiency hydraulics, IE3 electric motor efficiency and the optional Hydrovar variable speed drive, can deliver low operation costs and

reduced energy consumption. The Xylem range of pumps offer the highest standards of performance, a compact footprint and are robust and reliable in the handling of a wide range of different liquids. What's more, Xylem stock holding means that availability is always able to meet demand, meaning customers can get their pump of choice whenever and wherever it is needed.

Flows up to:	4,600 m ³ /h
Head up to:	1000m
Size from:	DN25 up to DN600
